

## Set command

set,relayx,status

Range:

x = 1, 2, 3 or 4

status = on/off

Example:

set,relay1,on    ← turn on relay 1

set,relay1,off    ← turn off relay 1

## Repeat command

Repeat,relayx,initialState,timeOn,TimeOff,repeatCycles

Range:

x = 1, 2, 3 or 4

initialState = on/off

timeOn = time in milliseconds

timeOff = time in milliseconds

repeatCycles = complete cycles (0 to infinite cycles)

Example:

repeat,relay1,on,1000,2000,0    ←    Infinites cycles with 1000 ms turn on and 2000 ms turn off. Start with state on.

repeat,relay2,off,1000,2000,5    ←    5 cycles with 1000 ms turn on and 2000 ms turn off. Start with state off.

## OBS

Commands must be sent with \r\n and must have all lowercase characters (case sensitive).
